Open Source Development Intern
May 2026 - July 2026
 - **Design:** Created vector illustrations and graphics using Inkscape and enhanced digital images with GIMP for high-quality visual content. Designed professional brochures, posters, and print-ready layouts using Scribus, following desktop publishing and design best practices.
 - **Animation:** Developed 2D animations using Synfig Studio, applying keyframing, tweening, and timeline-based animation techniques. Produced engaging animated content by combining motion design principles with open-source animation workflows while incorporating mentor feedback.

PROJECTS

- **Drug Review Sentiment Analysis System:**
 - Developed an end-to-end sentiment analysis system on 161k+ drug reviews using LightGBM.
 - Deployed an interactive Streamlit application for real-time healthcare sentiment analysis.
 - Contributed findings to a research paper and achieved 90% user satisfaction.
- **Deepfake Image Detection:**
 - Developed a 2D CNN model to classify real and fake facial images.
 - Trained the model using preprocessing and data augmentation techniques.
 - Achieved approximately 96% accuracy and validated performance against existing architectures.
- **BERT-Based Vendorship CRM:**
 - Fine-tuned RoBERTa and BERTweet models for vendor sentiment analysis.
 - Performed data preprocessing, tokenization, and model evaluation.
 - Integrated transformer-based NLP models into the CRM analytics pipeline.
